

INTEGRITY IS OUR BUSINESS

Whether it's the soundness of a watertight space, or the way we conduct business, integrity is the foundation of everything we do at Marine & Construction Supplies.

Serving the marine industry since 1975, Marine & Construction Supplies is a family-owned business that stands by its name and reputation. We provide products and services that you can depend on. Our customers rely on us to help them understand what product best fits their needs, match them with the most cost-effective solution, and deliver this high-quality product within the time frame we promise. We specialize in challenging applications where a custom product creates the best watertight solution, while saving time and money and never compromising on quality.

Serving the marine and construction industry
with integrity since **1975.**

PRODUCTS REPRESENTED BY MARINE & CONSTRUCTION SUPPLIES

CEN-TEX MARINE FABRICATORS

- Watertight and weathertight single panel doors with individual dogs, quick-acting dogging mechanisms with wheel-operation and lever-operation, as well as watertight and weathertight double doors
- Watertight doors with wide frames for bolt-on installation on concrete walls. Customers have installed these doors on dry wells, machinery spaces, buildings in flood plains and coastal areas where hurricanes and storm surges are a concern
- Flush and raised cargo hatches, deck hatches and scuttles
- Customers have used our watertight and airtight products for industrial "bag house" dust collectors, flood prevention in the New York Subway system, emergency escape hatches for condominiums built in an old missile silo, demolition training for the US military, and in fire-training simulators
- Bolted plate manholes
- Fixed lights and portholes
- All spare parts and gaskets for Cen-Tex products

SPEICH & SPRAGUE WIPER SYSTEMS

Sprague air-driven wiper motors are reliable, weather-proof motors that can be installed inside or outside the cab, withstand punishing abuse, and can be used in areas where electrical sparks are a safety hazard. Air-driven pantograph wipers are used extensively in the control cabs for oil drilling rigs.

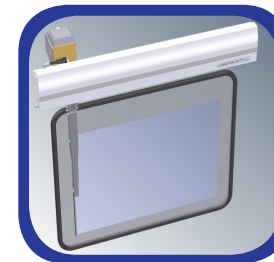

INDUSTRIAL GRADE WIPER ARMS

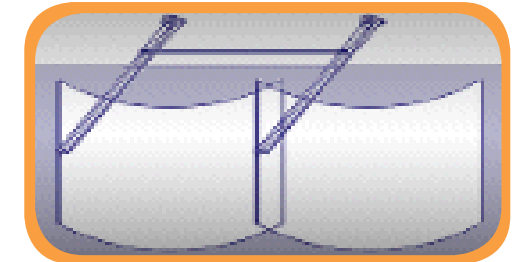

PENDULUM ARMS

PANTOGRAPH ARMS

SPEICH STRAIGHT LINE

DOUBLE PANTOGRAPH ARMS

Speich wiper systems come in pendulum, pantograph, and straight-line configurations. Wiper systems are available in the following voltages: 12V DC, 24V DC, 110 AC, and 220V AC. Speich produces made-to-measure systems used world-wide. Speich is the exclusive supplier of windscreen wipers to the Italian Navy.

The arms are custom made using AISI316 stainless steel. The standard finish is hand-polished natural color (black is available upon request). Arms length ranges from 500mm to 900mm for both pantograph and pendulum setups, in either single or double configurations.

DELIVERABLES

Commercial-grade watertight doors, hatches, manholes, scuttles, and portlights from Cen-Tex Marine Fabricators
Heavy-duty Speich straight line, pantograph, and pendulum windshield wipers in 12 and 24V DC, and 110V AC
Heavy-duty air-driven Sprague pantograph wipers
Delivery times you can depend on, even under extremely tight deadlines
Custom solutions for a wide variety of applications
Quality supplies at competitive pricing

TESTIMONIALS

"I have been in the Purchasing Department at Nichols Brother Boat Builders for 35 yrs. During those 35yrs I have used Marine & Construction Supplies as a supplier for doors, hatches, and window wipers. They are one of my most trusted & reliable vendors. Their pricing is fair and their delivery times are right on the money. I have had some extremely tight delivery times in the past and they have always gone out of their way to help me out." - **Fred Becker, Purchasing**

"Our customers demand a very short delivery time on most all projects, hatches and doors are no exception. The manufactures we have contacted in the past could never meet these delivery requirements, but Marine & Construction Supplies pulls it off every time." - **Clay Peil, The Buying Network, Inc.**

"We've used MCS for a large variety of projects, from modified containers that need water tight hatches to doors that are used in sub-zero climates without failure. The MCS team has always provided timely, courteous, and professional service to fit all of our specialized needs!" - **Barry Harmon, Mckinney Containers**
